EDUCATION

University of Florida

Expected May 2027

Bachelor of Science in Computer Science — GPA: 3.85/4.0

Gainesville, FL

- **Relevant Coursework:** Data Structures and Algorithms, Enterprise Software Engineering, Database Systems, Operating Systems, Computational Organization, Cryptology
- **Certifications & Awards:** Codepath Cybersecurity Certificate, College of Engineering Dean's List 2023

TECHNICAL SKILLS

Languages: Python, C++, HTML/CSS, Javascript/Typescript, SQL, MATLAB, ARM/Assembly

Frameworks: Node.js, Next.js, Express.js, Fastify, React.js, Pandas, NumPy

Tools: Git, Gitlab CI/CD, Agile Development, Linux/Bash, Vercel, AWS, Google ADK, Docker, Figma, GitHub API, Prisma, MariaDB, MongoDB, PostgreSQL, Wireshark, Splunk

WORK EXPERIENCE

Incoming Software Engineer Intern

Jun 2026 – Aug 2026

Microsoft

Redmond, WA

Software Engineer Intern

Jun 2025 – Nov 2025

Lockheed Martin

Orlando, FL

- Engineered intuitive and modern dashboards from NPS data, streamlining YOY analysis with custom Recharts components—reducing reporting time by **60%** for administrators across the suite of applications.
- Led an agentic AI project, building a RAG pipeline and LLaMA-4 to generate and iteratively refine Jira battle planning tickets, streamlining sprint planning and saving the 1LMX division **960+ hours** per sprint.

Technical Developer

May 2025 – Present

SwampHacks XI

Gainesville, FL

- Developed a modular Discord bot in **Python** with automated moderation, ticketing for mentor-hacker communication, and LLM summarization deployed the bot on a private VPS tunnel to ensure 24/7 up-time.
- Managed the **500+** member SwampHacks community server by building custom automation tools and utility commands to enhance event support.

Frontend Developer Intern

Jan 2025 – Apr 2025

University of Florida, College of Medicine

Gainesville, FL

- Developed in **React** an optimized Year-to-Date Normalized Performance Module to analyze staff and student funding, enabling precise financial tracking across **30+** medical departments.
- Parsed **10,000+** data entries using Python, creating dynamic MUI effort tables for the Association of American Medical Colleges (AAMC) that enhances data visualization for administrators.

PROJECTS

GitFlow | [Website](#) | [Devpost](#) | React, FastAPI, Express.js, Docker

- **1st place winner** and “Most Creative” project at ShellHacks 2025 for engineering a fully containerized, zero-setup development environment using **Docker** and the **GitHub API**, enabling live application exploration.
- Developed deployment workflow with Express API endpoints and pipelines aligned with microservices principles; integrated **ElevenLabs AI** voice summaries for real-time code reviews and insights.

GatorAI Website | [Website](#) | Typescript, Next.js, Three.js

- Engineered the GatorAI club website in Next.js, optimizing performance, improving SEO, and boosting user engagement by **40%** through an interactive 3D experience.

Fortnite Pathfinder | [Website](#) | React, TailwindCSS, Git, Vercel

- **1st place winner** among 175+ groups in a competition focused on algorithm data processing, building a **React** application to visualize and compare Dijkstra's vs A* Search, demonstrating the importance of efficient algorithms.
- Mapped **500,000+** terrain data points to build an accurate interpretation of the in-game map.
