EDUCATION

University of Florida

Expected May 2027

Bachelor of Science in Computer Science — GPA: 3.85/4.0

Gainesville, FL

- **Relevant Coursework:** Data Structures and Algorithms, Enterprise Software Engineering, Database Systems, Operating Systems, Computational Organization, Cryptology
- **Certifications & Awards:** Codepath Cybersecurity Certificate, College of Engineering Dean's List 2023

TECHNICAL SKILLS

Languages: Python, C++, HTML/CSS, Javascript/Typescript, SQL, MATLAB, ARM/Assembly

Frameworks: Node.js, Next.js, Express.js, Fastify, React.js, Docker, Pandas, NumPy

Tools: Git, Gitlab CI/CD, DevOps, Agile Development, Linux/Bash, OpenSSL, Clion, Figma, Atlassian, Vagrant, RESTful APIs, Prisma, MariaDB, MongoDB, PostgreSQL, Blender, Wireshark, Splunk

Libraries: TailwindCSS, Three.js, OpenStreetMap, Framer Motion, OpenCV

WORK EXPERIENCE

Software Engineer Intern

Jun 2025 – Present

Lockheed Martin

Orlando, FL

- Built a Net Promoter Score (NPS) feedback system adopted by **1,200+** employees, leveraging Prisma ORM to architect scalable schemas, and aggregate employee responses into a PostgreSQL database.
- Engineered intuitive and modern dashboards from NPS data, streamlining YOY analysis with custom Recharts components—reducing reporting time by **60%** for administrators across the suite of applications.
- Led an agentic AI project, building a RAG pipeline and LLaMA-4 to generate and iteratively refine Jira battle planning tickets, streamlining sprint planning and saving the ILMX division **960+ hours** per sprint.

Technical Developer

May 2025 – Present

SwampHacks XI

Gainesville, FL

- Developed a modular Discord bot in **Python** with automated moderation, ticketing for mentor-hacker communication, and LLM summarization with structured output; deployed the bot using a Raspberry Pi on private TailScale VPS tunnel to ensure 24/7 up-time.
- Managed the **500+** member SwampHacks community server by building custom automation tools and utility commands to enhance event support.

Frontend Developer Intern

Jan 2025 – Apr 2025

University of Florida, College of Medicine

Gainesville, FL

- Developed in **React** an optimized Year-to-Date Normalized Performance Module to analyze staff and student funding, enabling precise financial tracking across **30+** medical departments.
- Parsed **10,000+** data entries using Python, creating dynamic MUI effort tables for the Association of American Medical Colleges (AAMC) that enhances data visualization for administrators.

PROJECTS

GatorAI Website | [Website](#) | Typescript, Next.js, Three.js

- Engineered the GatorAI club website in Next.js, optimizing performance, improving SEO, and boosting user engagement by **40%** through an interactive 3D experience.
- Showcases club information, current AI projects, recorded ML lectures, board members, and sponsor highlights, driving **community awareness** and partnership opportunities.

Fortnite Pathfinder | [Website](#) | React, TailwindCSS, Git, Vercel

- **1st** place winner among 175+ groups in a competition focused on algorithm interpretation and data processing.
- Built a **React** web application to visualize and compare Dijkstra's vs A* Search, demonstrating the importance of efficient algorithms.
- Mapped **500,000+** terrain data points to build an accurate interpretation of the in-game map.

PicklePals | [Repository](#) | Typescript, Next.js, MongoDB Atlas

- Led development of a community-driven **full stack** app that connects pickleball players with local courts and tournament planning via an interactive Mapbox GL map showcasing 100+ courts across the United States.
- Incorporated **Agile practices**, including weekly standups, sprint planning and backlog management, to prioritize work and iteratively deliver new features.
